

IWA MEWE 2016 - Poster Schedule

Poster session I Monday 15:00 - 17:00

Environmental biotechnology: discovering and applying recently discovered microbial physiologies
New microbial processes for resource recovery, carbon capture and resource efficiency
Systems biology approaches for assessing microbial communities in water engineering
The ecology of antibiotic resistance genes in water engineering systems
Viruses in water engineering microbial communities: Prevalence and consequences
Pathogens and invasion in water engineering microbial communities: concepts and observations
Methods for monitoring and assessing microbial communities in water engineering
Biofouling and biocorrosion in engineered water systems

Poster session II Tuesday 15:00 - 17:00

Managing engineered biofilms: Real world experience
Managing microbial communities: From full to lab scale experience
Microbial ecology in aerobic granular sludge processes
Algal Technology Driven Water Engineering Operations
Beneficial biofilms in water engineering
Ecological Frameworks for Understanding Microbial Dynamics in water engineering applications
New developments in microbiology of drinking water production and distribution

All posters will be up for the duration of the conference.

Please hang posters by lunch on Monday and remove them by lunch on Wednesday
A list of posters and corresponding poster board numbers will be available at the venue.
